

# ADITYA VISHWAKARMA

adityavishwa616@gmail.com | linkedin.com/in/aditya-vishwakarma-b700b2331 | github.com/Aditya-Vishwakarma722

## PROFESSIONAL SUMMARY

Computer Science undergraduate focused on Java backend development and software engineering. Hands-on experience building RESTful applications with Spring Boot, Spring Security, MongoDB and Maven, with practical knowledge of authentication, RBAC, CRUD APIs, transactions and layered architecture. Strong foundation in DSA, OOP, Java Collections, exception handling and concurrency, supported by continuous GitHub and LeetCode practice.

## TECHNICAL SKILLS

- **Languages:** Java, C, C++, Python
- **Backend & Frameworks:** Spring Boot, Spring MVC, Spring Security, REST APIs, Hibernate/JPA, Lombok
- **Databases:** MongoDB, MySQL | **Data Access:** Spring Data MongoDB, DBRef, CRUD, MongoDB Transactions
- **Core CS:** Data Structures & Algorithms, OOP, Collections, Multithreading/Concurrency, Exception Handling, DBMS
- **Developer Tools:** Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code, PowerShell, Shell
- **Web & Deployment:** HTML, CSS, TypeScript, Vercel | **Creative:** Blender, Unreal Engine 5, Adobe After Effects

## PROJECTS

### SkillBridge — Java / Spring Boot / MongoDB | GitHub

- Developed a collaborative platform to bridge the gap between students and industry projects using **Java 21** and **Spring Boot**.
- Implemented **Role-Based Access Control (RBAC)** to manage distinct workflows for Students (applying for projects) and Industry partners (posting opportunities).
- Built secure authentication modules using **Spring Security**, utilizing BCrypt for password hashing and maintaining session integrity.
- Designed a scalable MongoDB schema to handle complex relationships between project listings, student applications, and user profiles.

### Journal Prototype — Java / Spring Boot / MongoDB | GitHub

- Built a RESTful journal management service with **Java 21**, **Spring Boot 4.0.7**, **Spring Security**, **MongoDB** and Maven.
- Implemented user registration, BCrypt password hashing, HTTP Basic Authentication and **Role-Based Access Control (USER/ADMIN)**.
- Developed authenticated CRUD APIs for journal entries with ownership isolation using the authenticated security context.
- Configured MongoDB multi-document transactions with @Transactional and DBRef relationships between users and journal entries.
- Designed a layered architecture across Controller, Service, Repository, Entity and Configuration components.

### Personal Portfolio — HTML / CSS / TypeScript / Vercel | GitHub | Live

- Developed and deployed a responsive portfolio showcasing software projects, technical skills, resume and Blender work.
- Implemented responsive UI, reusable components and a project/contact presentation using HTML, CSS and TypeScript; deployed with Vercel.

### Java DSA & Core Programming Practice | GitHub

- Maintains structured Java practice covering OOP, Collections, Multithreading, Exception Handling and DSA topics including arrays, strings, linked lists, stacks, queues, recursion, searching and sorting.

## EXPERIENCE

### Web Development Intern — Future Interns

- Developed responsive web projects and contributed to client-oriented website design and implementation tasks.
- Participated in project presentations and live pitching, strengthening practical frontend and professional communication skills.

## EDUCATION

**B.Tech — Computer Science & Engineering | Aditya College of Engineering & Technology (ACET), Surampalem**  
2024–2028 (Expected) | **CGPA: 7.9**

## CERTIFICATIONS

Future Interns Internship Certificate | Letter of Recommendation (LOR) — Future Interns

## PROBLEM SOLVING

Regular LeetCode practice covering arrays, strings, linked lists, stacks, searching, sorting and complexity analysis.

## LANGUAGES

English — Professional Working Proficiency | Hindi — Native | Japanese — Beginner
